laurenceburce@gmail.com

Good day,

I hope this message finds you well. My name is Laurence Burce. I graduated with a Bachelor of Science degree in Computer Engineering from Mapua University (formerly known as Mapua Institute of Technology) which is based in the Philippines. It is one of the top performing schools in engineering in the country and it is an ABET accredited school which is internationally recognized. I also have previous working experience with Oracle for about 2 years as a Software Developer. Upon careful consideration and personal reflection, I have made the decision to explore new opportunities that align with my career goals. Specifically, I am keen on finding a similar position in the United States, preferably in San Diego, California or one that offers remote work options. I am pleased to mention that I am a citizen of the United States, which allows me to work in the country for any employer.

As I searched through various job posting websites, I noticed that there are software developer positions available in your company. Considering my previous experience with Oracle, I believe my skills and knowledge would be a valuable addition to the projects you are currently handling. My experience with Oracle Products has provided me with a strong foundation, and I am eager to take on new challenges that will further expand my expertise.

Thank you for taking the time to review my inquiry. Please feel free to contact me at the provided email if you require any further information or if there is anything else I can provide. Looking forward to the possibility of working with you in the future.

Sincerely,

Laurence Burce
